Slide n' Dine

AUSTRALIA'S ONLY DUAL CONTROL DINING /MOBILITY CHAIR

Slide n' Dine has been developed with a unique dual-control operation that releases the brake on the four locking-casters, either by the user with a simple-to-release lever beside their seat, or by an independent carer from behind the back of the chair.

The Slide n' Dine is available in two frame heights to suit a wider range of users and tilt up arms designed to be fitted at three height positions for even more comfort.

Two seat options are offered with a standard PU foam seat or an upgraded Gelteq Memory Foam seat, both with the option of a coccyx cutout.

Designed for people who have a limited range of mobility difficulties, including those with disabilities where side-entry from a wheelchair is available by the lifting arms. Slide n' Dine also caters for others who have a greater range of independence, and is suitable for use in residential care, nursing homes and in domestic applications.

Dal Brands is committed to Bringing Movement To Your Workplace – Slide n' Dine continues this ethos into our expanded furniture range.
