

WALKING

Alinker Walking Bike

- Upright, pedal-free walking support for ages 8+
- Weight-bearing through the seat with feet on the ground
- Lightweight, foldable frame in three size options

R82 Crocodile (All Terrain option available)

- Posterior walker supporting an upright posture
- Adjustable for growth and changing needs
- All-Terrain version suitable for grass, gravel, and uneven paths

Rifton E-Pacer

- Gait trainer with electric lift for safe transfers
- Strong frame with advanced trunk and pelvic support
- Suitable for larger children and teens

Nimbo

- Supports upright posture by providing posterior (reverse) walker support
- Adjustable aluminium frame available in multiple sizes with maneuverable 5" rear wheels and swivel front wheels for controlled direction.
- Folding design for easy transport/storage plus optional accessories like bumper guards and storage pouch.

Ormesa Grillo

- Support walker/gait trainer designed to facilitate movement and promote independence for users with reduced mobility.
- Highly adjustable with ergonomic pelvic and thoracic supports and customisable configurations.
- Lightweight frame with front or rear drive options for versatile use in home, school, or community settings.

WALKING

R82 Mustang

- Designed to encourage exploration, active participation, and upright walking support.
- Available in multiple sizes to accommodate different heights and supports up to ~80 kg.
- User-friendly design suitable for therapeutic and home environments

Rifton Pacer Gait Trainer

- Dynamic, configurable gait trainer offering support for natural weight-bearing and stepping patterns.
- Customisable with multiple upper frames, bases, and accessory options for individualized positioning.
- Designed for everyday mobility practice across environments.

Rifton Tram

- Three-in-one transfer and mobility device combining gait training, sit-to-stand, and seated transfers.
- Safe and efficient support system with patented patient securing buckle and lightweight, manoeuvrable frame.
- Supports users up to ~159 kg and reduces caregiver strain in transfers.

Schuchmann Malte Posterior (outdoor version also available)

- Versatile posterior walker encouraging upright posture with pelvic support and comfy handles.
- Abducted frame design offers stability while discouraging an excessively wide base.
- Adjustable handles and wheel locks support directional control and adaptability to growth.

Schuchmann Macy Anterior

- Anterior four-wheeled walker offering stable support for early walking practice.
- Adjustable height/width handles and directional locks for improved control and balance.
- Optional accessories like seat, back strap, and basket for comfort and practicality.

STANDING

Ella Stander

- Step-less tilt range up to 90°
- Manual or powered adjustment options
- Highly adaptable for individual positioning needs

Rifton Multi Stander

- Supports anterior and posterior standing
- Adjustable hip abduction and trunk supports
- Designed to grow with the child

Jenx Monkey Prone Stander

- Smooth, adjustable prone-to-upright angle support helps gently build tolerance to standing over time.
- Excellent thoracic and pelvic support with flexible leg positioning for comfortable postural alignment.
- Ideal for young children as a fun, approachable introduction to standing therapy.

Jenx Multistander

- Abducted standing option allows for neutral or abducted hip positioning, supporting diverse therapeutic needs.
- Adjustable abduction from 0–30° in fine increments enhances personalised positioning.
- Can retrofit to existing Multistanders or be ordered as a complete base unit.

Jenx Standz 1

- Versatile abducted standing system offering both prone and supine positioning up to 60°.
- Extensive range of accessories to cater to diverse postural needs and sizes.
- Tool-free adjustments for quick, effective clinical postural changes.

STANDING

Jenx Supine Stander

- Robust standing frame designed for safe supine support from infancy to adult sizes (up to ~100kg).
- Smooth angle adjustment from horizontal to upright encourages balance and standing development.
- Outstanding postural support and pelvic stability for dynamic standing programs.

Ormesa APP Stander

- Multi-sensorial stander with patented vibration technology that transforms audio into therapeutic sensory input.
- Encourages engagement and motivation through interactive sensory stimulation.
- Can connect with tablets or devices for integrated therapy and play

Ormesa Dondolino

- Tilt-adjustable prone/upright stander designed to support everyday activity and postural alignment.
- Easily adapts with a sturdy frame and height/rotation adjustments for growing users.
- Promotes inclusion by supporting interaction at standing height in various environments.

Ormesa Mini Standy

- Vertical stander that provides safe, gentle weight-bearing support to promote bone, muscle, and cardiopulmonary health.
- Adjustable support encourages upright interaction with the environment and social engagement.
- Available in multiple sizes with pelvic and trunk support for growing children

R82 Gazelle

- Supports upright standing with robust support and adjustment options for growing users.
- Modular design accommodates therapeutic positioning and promotion of active engagement.
- Durable and adaptable for a range of paediatric standing needs.

STANDING

R82 Meerkat

- Dynamic upright standing frame with modular accessories for personalised positioning and movement support.
- Centre column positioning gives space for movement and exploration.
- Suitable for a wide height range with a high weight capacity for durability and versatility.

R82 Rabbit Up

- Adaptive frame supporting both prone and upright standing positions for paediatric use.
- Optional driving wheels enhance independence and active participation.
- Angle-adjustable centre bar with quick-release wheels for flexibility and adaptability.

Rifton Mobile Stander

- User-propelled standing device offers mobility and independence for users who cannot stand unaided.
- Encourages strengthening of motor skills and active participation.
- Ideal for home or clinical environments to facilitate dynamic standing and movement.

Schuchmann Till Stander

- A reliable standing system offering upright postural support.
- Designed for children requiring therapeutic standing assistance.
- Adjustable support positions aid in symmetry and alignment during standing.

INDOOR SEATING

P Pod Seating System

- Unique beanbag-style postural support seat
- Available in multiple sizes with optional growth liner
- Provides comfortable, adaptive positioning

Zoomi+ Activity High Chair

- Mobile high chair with skis for indoor movement
- Quick-release tray and padded seat
- Ideal for home, school, and therapy settings

Careflex Smart Seat Pro II

- Adjustable positioning seat with easy tilt and recline options for comfort and postural support.
- Modular design allows individualised configuration to match user needs and growth.
- Durable build with supportive cushioning and accessory compatibility for daily use.

Jenx Corner Seat

- Versatile adaptive seating designed for angled corner positioning and trunk support.
- Adjustable, supportive lateral pads and inserts for refined postural alignment.
- Lightweight and adaptable suitable for therapy rooms, classrooms, or home use.

Jenx Junior

- Ergonomic junior seating system geared for postural support and comfort for kids.
- Customisable support accessories help tailor lateral and pelvic positioning.
- Strong yet lightweight frame ideal for active environments and everyday mobility.

INDOOR SEATING

- Encourages movement, independence, and fun

Schuchmann follow me

- Bike Attachment to enable Schuchmann Momo Trike to be attached in tandem to a lead adult bike.
- Easy connection in a few steps after initial installation.

Schuchmann Momo

- Therapy trike with wide range of configurations, accessories to create an individualised riding experience
- Various Drive configurations enabling all ability of riders to find their best riding ability.
- Stable postural control systems.

BATHROOM + HYGIENE

Combi Toilet Seat Chair

- Supportive starter toilet chair
- Can be used as both seating and toileting support
- Simple, practical design for daily use

Smirthwaite Bath Corner Chair

- Compact, lightweight bath seating support
- Adjustable for improved sitting balance
- Easy to handle and store

Throne Children's Toilet Rail & Step

- Stable, adjustable rail and step system that supports safe, confident toilet transfers for children.
- Built-in height and grip adjustments accommodate growing kids and various toilet heights.
- Durable, easy-to-clean construction ideal for home or clinical bathroom setups.

R82 Flamingo

- Splash-resistant bath support seat designed to make bathing safer and more comfortable.
- Ergonomic contours and secure positioning help users sit confidently during wash routines.
- Lightweight yet sturdy, easy to install and adjust for different bath setups.

R82 Swan Curo

- Supportive commode for toileting and bathing
- Wide range of accessories for postural support
- Designed for children with complex needs

BATHROOM + HYGIENE

R82 Heron

- Versatile standing and support frame that offers secure, adjustable trunk and pelvic positioning.
- Designed to assist with mobility tasks, transfers, and postural alignment.
- Robust construction with multiple accessory options for tailored support.

R82 Manatee

- Supportive bath seat that provides comfort and stability during bathing activities.
- Ergonomic design with water-safe materials for everyday hygiene routines.
- Easy to position and clean, great for home or therapy environments.

R82 Orca Bath Tub by Etac

- Full-support bath tub solution designed for safe and comfortable bathing for users with mobility challenges.
- Integrated ergonomic seating and positioning aids reduce the need for manual handling.
- Durable, water-resistant design with smooth contours and easy drainage.

R82 Penguin

- Adaptive seating solution tailored for aquatic or bath use with secure support and comfort.
- Contoured and water-friendly materials facilitate safe bathing engagement.
- Stable frame and positioning options help caregivers with wash routines.

BATHROOM + HYGIENE

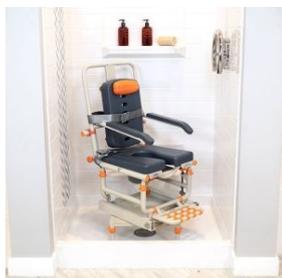

Rifton HTS (Handwashing / Toileting Support)

- Multi-purpose hygiene support chair that assists with handwashing and toileting tasks.
- Fully adjustable features promote posture and ease of use for varying needs.
- Built with easy-clean surfaces and robust framing for frequent use.

Rifton Wave

- Ergonomically designed hygiene support seat that offers stability and comfort during wash and toileting routines.
- Adjustable positioning accessories for personalised comfort and posture alignment.
- Practical, easy-to-clean construction ideal for therapy and everyday use.

ShowerBuddy P1

- Innovative shower support chair with smooth, non-slip seating and pivoting base for easy transfers.
- Designed to enhance independence and safety during showering tasks.
- Durable, water-resistant materials and adjustable features for customised comfort.

ShowerBuddy P2

- Premium shower support chair with enhanced stability, adjustable tilt, and ergonomic seating.
- Pivoting design allows for easy access and transfer in wet environments.
- Built with corrosion-resistant materials and comfort-focused features for daily independence.

STROLLERS

R82 Chilla Stroller

- Adjustable seating system for long-term use
- Suitable for urban and outdoor environments
- Grows with the child

Bingo Evo

- Ergonomic, versatile stroller with adaptable seating options for active daily life.
- Adjustable backrest and footrest keep users comfortable over longer outings.
- Robust yet lightweight build supports smooth navigation on varied surfaces.

Convoid Cruiser

- Robust all-terrain stroller engineered for active mobility across diverse surfaces.
- Adjustable seating and harness features ensure safe, comfortable positioning.
- Strong frame and durable wheels make it ideal for outdoor excursions.

Convoid EZ Rider

- Lightweight, user-friendly stroller designed for quick setup and daily activities.
- Comfortable seat with supportive back and harness for stability.
- Easy push and smooth handling for carers and users alike.

Convoid Rodeo

- Adventure-ready stroller with enhanced suspension and rugged wheels.
- Adjustable, comfortable seating and supportive straps for secure use.
- Designed for rougher terrain while keeping ride smooth and controlled.

STROLLERS

DoBuggy

- All-terrain, active lifestyle stroller with enhanced suspension and comfort seating.
